20 MS. RASH: My feeling on the situation is
21 such that we live approximately three days or 32
22 hours away from Las Vegas. We just took the trip on
23 Route 80 to Route 76 to Route 70 and enjoyed the
24 scenery very much, but we're very much aware of the
25 difficulties in transporting nuclear power and

0034

1 radioactive isotopes and rods from plants which are
2 located on the Eastern Coast of the United States of
3 America. It is too far, too treacherous and
4 probably unproductive in that since our country
5 initiated the power plants in the first place and
6 now they are found to be no longer as useful as
7 prior, they should in fact encapsulate in concrete,
8 bury the rods very close to the locations at which
9 they presently are at.
10 Due to the fact that we now have
11 grandchildren, we are concerned about the future of
12 our grandchildren and great-grandchildren and
13 generations to follow. Although Yucca Mountain may
14 be solid in mass and difficult to penetrate by any
15 form of bomb or plane or missile, it is too far and
16 too treacherous to transport the nuclear waste.
17 I rest my case.
